# VERTICAL TENSION ANODE STRING

## DATA SHEET

This vertical tension anode string is an anode array that comprises a series of MMO tubular anodes chained onto an electrical cable. The MMO tubular anode secured into the perforated PVC casing pipe, is made from titanium tubes coated with a mixed metal oxide catalyst. Regarded as a cost-effective option used in the impressed current cathodic protection systems of offshore or marine structures, it can be installed without divers or ROV equipment.

## Worldwide Service Network

Our worldwide network of sales and service centers can provide immediate advice and assistance on the complete range of products.
